PROFILE

Frontend Developer skilled in HTML, CSS, and JavaScript, with project experience in .NET (ASPX, C#) and Python. Built a full-stack project integrating AI for crop price prediction. Proven ability to design intuitive user interfaces and integrate backend services into responsive, data-driven web applications. Eager to build modern, dynamic UIs using React.js and actively pursuing opportunities to grow as a full-stack or frontend developer in real-world projects involving modern JavaScript frameworks. Highly skilled in communication, collaboration, and problem solving.

WORK EXPERIENCE

Arrow Technologies & Solutions ,Nashik JAN 2025 - JUNE 2025
Full Stack Developer Intern

- Worked on developing and maintaining full-stack web applications using technologies such as HTML, CSS, JavaScript, ASP.NET (C#), and SQL Server.
- Built and optimized responsive user interfaces with a focus on performance and usability.

PROJECTS

Commodity Intelligence System

- Built a web-based crop analysis app using ASP.NET (ASPX, C#) and Python, integrating YOLOv8 for crop detection and freshness classification from images.
- Applied Linear Regression for crop price prediction using historical data, with real-time analysis and results stored in SQL Server for visualization and reporting.

Furry Futures

- Developed “Furry Futures,” a responsive pet adoption platform using HTML, CSS, JavaScript, and Firebase, featuring real-time pet listings, user authentication, and an intuitive admin panel.
- Implemented an interactive adoption request system to streamline the adoption process and ensure a seamless user experience across all devices.

CERTIFICATES

- Participated in TECHTREK-25 Project Competition – College Level (2025)
- Internship Certificate in Website Design and Development – Internship Studio (2024)
- Java Programming Certificate – Great Learning
- 3rd Rank in Seminar on Blockchain Technology – Presented on “How Blockchain Works in IoT” (2023)
